

NORTHERN STRANDS

GRAIN BIN FALL PROTECTION SYSTEM

This fall protection system is a cutting edge product designed to protect farm workers from a fall while climbing or accessing a bin for repairs or inspections.

In today's world, worker/farmer safety has never been more emphasized and important than it is right now. At Northern Strands we believe serious injuries are preventable and avoidable with proper planning and systems in place. It is with this belief in mind that Northern Strands accepted the challenge of making grain bin inspections and repairs more safe by developing a fall protection system (not available for all bins. Compatibility list on other side of this brochure). When properly installed and used, our system will prevent a person from falling off a grain bin and impacting the ground or falling into the bottom of a grain bin and suffocating.

Introductory Offer!

Primary Kit
for your first bin
ONLY

\$599!

ABOUT US

With health and safety in mind, Northern Strands has been supplying industry since 1970, evolving into five major divisions that offer needed tools and technical knowledge in engineered fall protection, general rigging, suspended access, safety training, mine hoisting and attachments.

The Engineered Fall Protection Division offers a variety of fall protection systems, solutions and services. Custom-engineered solutions can be designed to suit specific requirements. Services and equipment include; inspection and replacement services for overhead and vertical lifelines, consulting, supply and installation services for single point anchors, guardrail systems, walkways, platforms and structural assessments.

FREQUENTLY ASKED QUESTIONS

Does the system work for any grain bin?

No, this system is designed for specific types of grain bins. See the bottom of this page for a list of compatible grain bins. However we are working on designing similar systems for other grain bins. Please contact us if you are interested in this system for a grain bin that is not on the compatibility list (see below). We are maintaining a contact list of interested parties. Your input will help us prioritize which bins we build Fall Protection Systems for first.

Where can I purchase parts or complete systems?

All parts, the primary kit and supplementary kits can be purchased at Northern Strands, 3235 Millar Ave, Saskatoon, SK.

What's the difference between the primary kits and the supplementary kits?

The primary kit is the first kit you purchase for your bins. The supplementary kit is the one you will purchase for every bin there after. As opposed to the primary kit, the supplementary kit does not have the Protecta One Size Fits All Harness, 4' Lanyard with built in energy absorber and the Static Wire Rope Grab.

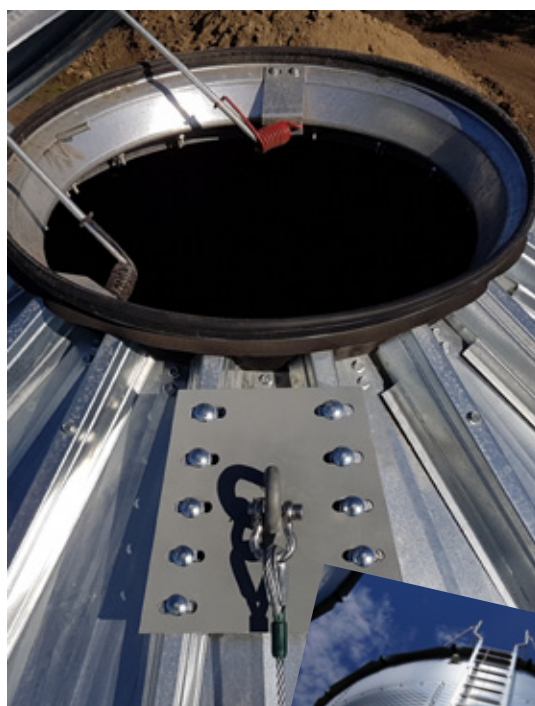

What if I don't want to install the system myself?

As fall protection experts, we understand that not everyone feels comfortable working at heights. Especially when your fall protection system is not yet in place. Please contact Northern Strands and we will be happy to assist you with finding a suitable contractor to install the system.

Compatible With:

Westor and Westeel 1805 bins.

We are currently working on Fall Protection Systems for other models of grain bins. Please contact us if you are interested in a Fall Protection System for a model of grain bin not listed.
